39a. Please explain:

All necessary security measures are in place and subject to membership and operations requirements as defined in KDD Rules and Regulations, and (as requested by linked (I)CSD) by Service Level Agreement between KDD and (I)CSD. Furthermore, pursuant to Book Entry Securities Act, a person in whose account (maintained in central registry) dematerialized securities are registered, is a legal holder of those securities. No segregation or identification procedures are necessary for the existence or enforceability of holder's right (entitlement) to dematerialized securities in the case of insolvency of KDD member, KDD or other depositories or SSS in case that links between them and KDD are established.

40. Has a business interruption recovery plan been developed in the event the linkages should become inoperable for any reason?

Yes

No (please answer 40a)

Other (please answer 40a)

ACCOUNT STRUCTURES AND RECORDKEEPING

The purpose of this section is to identify the nature of accounts; the naming convention is employed, the level of segregation achieved, accessibility in the event of bankruptcy and the frequency of reporting generated from them.

41. Are participants permitted to maintain more than one account at the depository?

Yes (please answer 41a)

No

Not applicable

Other (please answer 41d)

41a. If yes, please indicate number: (Choose one.)

An unlimited number of accounts.

More than one account (please answer 41b and indicate how many)

Other (e.g. subaccounts) (please answer 41c)

42. Are participants required/permitted to segregate assets held for their own benefit from those they hold for their clients?

Yes (please answer 42a)

No

Not applicable

Other (please answer 42d)

42a. If yes, is segregation required or simply permitted?

Required (please answer 42b)

Permitted (please answer 42b)

Other (please answer 42e)

42b. How does segregation occur? (Choose all that apply.)

- By separately designated participant accounts.
- By sub-accounts within a single participant account.
- By separately designated beneficial owner accounts.
- Other - e.g. share registration (please answer 42c)

43. Does the depository permit its participants to open accounts in the participant's own nominee name(s)?

- Yes (please answer 43a)
- No
- Other (please answer 43b)
- Not applicable

43a. If yes, do laws exist, which define as well as protect the rights of beneficial owners with respect to securities registered in nominee name?

- Yes
- No

44. In the event a participant's single or main account is blocked for any reason (e.g., insolvency, penalties, violations, liens), would securities held in any account or accounts on behalf of the participant's clients be accessible:

44a. By the participant's clients?

- Yes (please answer 44b)
- No
- Not applicable
- Other (please answer 44c)

44b. If yes, please describe briefly how clients of participants would access their securities and whether there would be any delay in their ability to do so:

Member's clients need to reallocate their assets to another participant of their choice before they can proceed normally with conduct of their business. Such reallocation does not mean that their assets would be in any danger of seizure by authorities controlling insolvency, since their assets are completely segregated from member's assets.

44d. By the intervening authorities controlling insolvency or other proceedings?

- Yes (please answer 44e)
- No
- Not applicable
- Other (please answer 44f)

44g. By the participant's creditors?

SETTLEMENTS

The purpose of this section is to identify the model of settlement employed, the relationship between cash and securities, and the basis on which participants meet their obligations.

48. The Committee on Payment and Settlement Systems of the Bank for International Settlements (BIS) has identified three common structural approaches or models for linking delivery and payment in a securities settlement system. Please indicate which model your procedures most closely resemble (Please refer to details on the models within the "Help" section located below this question): (Choose all that apply.)

- Model 1 - Gross, Simultaneous Settlements of Securities and Funds Transfers. (please answer 48a)
 Model 2 - Gross Settlements of Securities Transfers Followed by Net Settlement of Funds Transfers. (please answer 48a)
 Model 3 - Simultaneous Net Settlement of Securities and Funds Transfers. (please answer 48a)
 Not applicable
 Other (please answer 48b)

48a. Please briefly describe your settlement process, including how your settlement procedures may vary from the model chosen above (and as described below in the Help section)?

Stock exchange settlement

Trades concluded on Ljubljana Stock Exchange (LJSE) are settled on T+2. Settlement is executed in line with KDD Operations Rules. BIS Model 3 applies to stock exchange trades settlement.

Information on daily stock exchange transactions are sent to KDD's information system in single batch by 15:25 p.m. at the latest. KDD creates a file containing all received information and immediately asks LJSE for final confirmation. Trades become final as LJSE confirms this information - by 4:30 p.m. at the latest. KDD clears cash obligations and cash claims from respective counterparties, employing a multilateral technical settlement netting method - without affecting underlying contracts between the parties to the trade.

Settlement members are notified on final calculation of their positions and the required amount of liquidity reserve (serves as a liquidity risk management tool) by 4:45 p.m. on trading day at the latest. Members have on-line access to this information. Liquidity reserve should be paid by 10.00 a.m. on T+1. Settlement members should arrange sufficient positions on sellers' securities accounts and cash funds on respective DCAs by 10.00 a.m. on T+2. Final settlement of securities and cash is executed by 3.00 p.m. on T+2 at the latest.

The role of the KDD is to perform its function as the settlement facilitator and to transfer respective securities. KDD never acts as principal or assumes any credit risk. Eventual

member's default is always covered only with funds from the Guarantee Fund, which is the main risk mitigation tool.

OTC settlement

For OTC-DVP transactions settlement BIS model 1 applies.

Generic description of OTC settlement: Instructing party sends its settlement instruction to KDD's CRVP - Central Registry System (via SWIFT, direct input in Klient, XML msg. import). CRVP performs settlement instruction validation. In case of negative validation CRVP rejects the settlement instruction and informs the instructing party. In case of positive validation CRVP immediately searches in the repository of unmatched settlement instructions for those counterparty instructions that have the same mandatory matching fields values (i.e. matching). If matching is not successful, the settlement instruction is placed in the repository of unmatched settlement instructions waiting for the matching instruction. Each member can see outgoing (delivering) and incoming (receiving) unmatched instructions regarding its securities accounts (house/client) via CRVP GUI and Web services. Unmatched settlement instructions remain in the repository of unmatched settlement instructions for 20 business days from the later of the intended settlement date or the date of the submission of the settlement instruction, after which date the instructions are cancelled. If matched successfully, reservation of securities on the account of the seller is attempted on intended settlement day (as required for T2S settlement). If this is done successfully, instructions are forwarded to settlement. If settlement attempt is not successful, the respective settlement instructions are queued for further settlement attempts (i.e. recycling) for unlimited period until successful settlement or until cancellation of respective settlement instructions. Cash leg of settlement requires sufficient funds on respective DCA.

OTC-FOP transactions settlement follows the same procedure, except cash leg.

Question 48 Help:

Model 1 - Gross, Simultaneous Settlements of Securities and Funds Transfers. These systems settle transfer instructions for both securities and funds simultaneously on a trade-by-trade (gross) basis, with final (irrevocable and unconditional) transfer of securities from the seller to the buyer (delivery) occurring at the same time as final transfer of funds from the buyer to the seller (payment). The securities settlement system maintains securities accounts and funds accounts for participants. Transfer of securities and cash are made by bookentry.

Model 2 - Gross Settlements of Securities Transfers Followed by Net Settlement of Funds Transfers. These systems settle securities transfer instructions on a trade-for-trade (gross) basis, with final transfer of securities from the seller to the buyer (delivery) occurring throughout the processing cycle, but settle funds transfer instruction on a net basis, with final transfer of funds from the buyer to the seller (payment) occurring at the end of the processing cycle.

The securities settlement system maintains securities accounts for participants, but funds accounts are usually held by another entity (often a commercial bank or the central bank). Securities are transferred by book-entry, such transfer being final at the instant the entries are made on the securities settlement system's books. The corresponding funds transfers are irrevocable, but not final. During the processing cycle, the system calculates running balances of funds debits and credits, the balance being settled at the end of the processing cycle when the net debit and net credit positions are posted on the books of the commercial bank or central bank that maintains the funds accounts. Settlement of funds accounts may occur once a day or several times a day.

Model 3 - Simultaneous Net Settlement of Securities and Funds Transfers. These systems settle transfer instructions for both securities and funds on a net basis, with final transfer of both occurring at the end of the processing cycle. Settlement may occur once a day or several times a day. The securities settlement system maintains securities accounts for participants. Funds accounts may be maintained by another entity, either a commercial bank or the central bank.

During a processing cycle, running balances of debits and credits to funds and securities accounts are calculated. All funds and securities transfers are provisional until the end of the processing cycle, at which time book-entry transfer of securities take place. If and only if all participants have sufficient balances of funds and securities, final transfers of the net securities balances and net funds balances are executed.

49. Are the cash and security movements simultaneous?

- Yes
- No (please answer 49a)
- Not applicable
- Other (please answer 49c)

OWNERSHIP OF SECURITIES

The purpose of this section is to determine how ownership of securities is represented, the ways the depository maintains ownership or control of securities held in the depository, and the extent to which ownership of assets held by the depository is separated from the proprietary assets of the depository.

50. How are depository eligible securities held by the depository?

- Securities in the depository are held in dematerialized form.
- Securities in the depository are held in certificated form.
- Other (please answer 50a)

51. If depository eligible securities are certificated, can depository eligible securities be held outside of the depository?

- All eligible securities must be held in the depository. (please answer 51b)
- Securities may move freely into and out of the depository. (please answer 51h)
- Once entered into the depository, eligible securities must remain in the depository. (please answer 51b)
- Certain designated securities may be held outside the depository. (please answer 51a)
- Not applicable
- Other (please answer 51k)

52. If securities are dematerialized:

May dematerialized security positions be re-certificated and held outside the depository?

- Yes (please answer 52a)
- No (please answer 52a)
- Not applicable
- Other (please answer 52j)

52a. Are the securities held: (Choose all that apply.)

- Through book-entry at the depository
- Through book-entry at a registrar or issuer (please answer 52b)
- Other (please answer 52k)

52d. If the securities held by the depository are recorded by book entry at the registrar, are the securities registered only to the depository, with the depository providing the function of recording ownership on a centralized basis for the market? (Choose all that apply.)

- Yes (please answer 52e)
- No (please answer 52g)
- Other (please answer 52l)

52i. If the securities held with the depository are recorded by book-entry at the registrar, what are the control features at the registrar for transfer of registrar positions to and from the depository (e.g., authentication procedures, reconciliation, confirmation of position at registrar)? Please describe:

Not applicable.
KDD acts as central depository and registrar.

52l. If other, please explain:

KDD acts as central depository and registrar.

Response Necessary/Eligibility Question

53. Rule 17f-7 requires that an Eligible Securities Depository “maintains records that identify the assets of each participant and segregate the system’s own assets from the assets of participants.”

- The lien may extend to settled client positions. (please answer 55d)
- Other (please answer 55d)

55e. If a lien is placed on a participant's account which has been designated for its clients, will the depository select certain securities to be subject to the lien?

- Yes (please answer 55f)
- No (please answer 55h)
- Other (please answer 55n)

55h. If no, please indicate whether the entire account will be subject to the lien.

- Yes
- No
- Other (please answer 55i)

55i. If other, please describe:

If a member has not fulfilled all requirements as specified in KDD's rules and regulations, KDD can be put a lien only on securities booked on member's house account. Member's clients' assets (booked on clients' accounts) are completely segregated from members' assets (booked on house accounts).

55j. For accounts designated as client accounts, do procedures exist to restrict the placement of liens only to obligations arising from safe custody and administration of those accounts?

- Yes (please answer 55k)
- No
- Other (please answer 55m)

55k. If yes, are the restrictions accomplished by:

- Contract between the depository and the participant
- Other procedures (please answer 55l)

55l. Please explain:

KDD members have the legal right to pledge their clients' securities in case of client's non-payment.

55n. If other, please explain:

If a member has not fulfilled all requirements as specified in KDD's rules and regulations, KDD can be put a lien only on securities booked on member's house account. Member's clients' assets are completely segregated from members' assets.

56. Transfer of Legal Ownership**Does the depository have legal authority to transfer title to securities?**

- Yes (please answer 56a)
- No
- Not applicable
- Other (please answer 56e)

56e. If other, please explain:

Generally, title to securities is transferred upon instruction of KDD members. However, pursuant to Book Entry Securities Act, Arts. 24, 27 and 36 state bodies or holders of public powers are also empowered to delegate to CSD to make entries into central registry (securities issuance/deletion/transfers and encumbrance attachments).

HANDLING OF SECURITIES OUTSIDE THE DEPOSITORY ENVIRONMENT

The purpose of this section is to consider the process (and any risk inherent within such a process) that involves the safekeeping of client assets while they are being removed from a depository and being lodged into a depository.

57. How are eligible securities lodged (that is, placed) in the depository system? (Choose all that apply.)

- A registered certificate in the name of the depository is delivered to the depository.
- A participant delivers the security with a valid transfer deed or stock power or other transfer document to the depository which then effects registration.
- A registrar re-registers the security in the name of the depository.
- Other (please answer 57a)
- Not applicable

57a. Please describe:

- Other (please answer 78c)

78c. If other, please explain:

Detailed description of Guarantee Fund composition, usage, management, asset yields, etc. are to be found in KDD Rules/Regulations. Contributions are made in cash. The following types of contributions to the Guarantee Fund exist:

(1) annual basic contributions (the same amount is applied to each member), which are determined by the sum of all settlement members' obligations for all their stock exchange transactions executed during a specific period,

(2) monthly additional contributions (determined individually for each member) in the amount determined by the extent and amount of the member's own obligations from stock exchange transactions executed during a specific period, and

(3) supplementary contributions, actually representing replenishment of the Guarantee Fund (determined individually for each member in relation to its share under the liability for fulfilment of obligation of another settlement member), which are required when a payment is performed on behalf of the Guarantee Fund in case of delivery or payment failure.

Supplementary contributions are required every time the remaining value of the Guarantee Fund falls below the specified share of initial total amount of the Guarantee Fund. In this regard, the non-defaulting members therefore guarantee the settlement with their whole liquidity. Supplementary contributions are refunded after (if) the payment claim against the defaulting settlement member, whose obligation was fulfilled using assets of the Guarantee Fund, is exercised.

78d. How is the fund financed? (Choose one.)

- Other (please answer 79h)

79e. Please explain:

Controls are evident from description of OTC and stock exchange settlement:

Stock exchange settlement

Trades concluded on Ljubljana Stock Exchange (LJSE) are settled on T+2. Settlement is executed in line with KDD Operations Rules. BIS Model 3 applies to stock exchange trades settlement.

Information on daily stock exchange transactions are sent to KDD's information system in single batch by 15:25 p.m. at the latest. KDD creates a file containing all received information and immediately asks LJSE for final confirmation. Trades become final as LJSE confirms this information - by 4:30 p.m. at the latest. KDD clears cash obligations and cash claims from respective counterparties, employing a multilateral technical settlement netting method - without affecting underlying contracts between the parties to the trade.

Settlement members are notified on final calculation of their positions and the required amount of liquidity reserve (serves as a liquidity risk management tool) by 4:45 p.m. on trading day at the latest. Members have on-line access to this information. Liquidity reserve should be paid by 10.00 a.m. on T+1. Settlement members should arrange sufficient positions on sellers' securities accounts and cash funds on respective DCAs by 10.00 a.m. on T+2. Final settlement of securities and cash is executed by 3.00 p.m. on T+2 at the latest.

The role of the KDD is to perform its function as the settlement facilitator and to transfer respective securities. KDD never acts as principal or assumes any credit risk. Eventual member's default is always covered only with funds from the Guarantee Fund, which is the main risk mitigation tool.

OTC settlement

For OTC-DVP transactions settlement BIS model 1 applies.

Generic description of OTC settlement: Instructing party sends its settlement instruction to KDD's CRVP - Central Registry System (via SWIFT, direct input in Klient, XML msg. import). CRVP performs settlement instruction validation. In case of negative validation CRVP rejects the settlement instruction and informs the instructing party. In case of positive validation CRVP immediately searches in the repository of unmatched settlement instructions for those counterparty instructions that have the same mandatory matching fields values (i.e. matching). If matching is not successful, the settlement instruction is placed in the repository of unmatched settlement instructions waiting for the matching instruction. Each member can see outgoing (delivering) and incoming (receiving) unmatched instructions regarding its securities accounts (house/client) via CRVP GUI and Web services. Unmatched settlement instructions remain in the repository of unmatched settlement instructions for 20 business days from the later of the intended settlement date or the date of the submission of the settlement instruction, after which date the instructions are cancelled. If matched successfully, reservation of securities on the account of the seller is attempted on intended settlement day (as required for T2S settlement). If this is done successfully, instructions are forwarded to settlement. If settlement attempt is not successful, the respective settlement instructions are queued for further settlement attempts (i.e. recycling) for unlimited period until successful settlement or until cancellation of respective settlement instructions. Cash leg of settlement requires sufficient funds on respective DCA.

OTC-FOP transactions settlement follows the same procedure, except cash leg.
