1 NOTES TO THE PRICE LIST

1. All amounts are in EUR.
2. Amounts do not include VAT or any other taxes. It is indicated, however, whether a service is subject to VAT.
3. Amounts do not include the costs of negative interest, the costs associated with sending extracts and letters abroad, bank charges for the processing of transfers from abroad and the costs associated with sending certificates for bearer securities. KDD is entitled to charge all such costs separately.
4. All fees must be paid by the due date stated in the relevant request, quote, pro forma invoice or invoice. Unless otherwise specified in the request, quote, pro forma invoice or invoice, all payments are due within 15 days of the issuance of the request, quote, pro forma invoice or invoice.
5. Fees charged on a monthly basis are charged in full for the first and last month, i.e. the month in which the basis for their billing arises and for the entire month in which the basis for their billing ceases to exist, respectively.
6. Where applicable, fees are calculated on the basis of the amount of share capital of the member-issuer, the total nominal value of securities, the number of holders of securities and the size of the member-issuer according to the AJPES business register as at the first day of the month for which the fee is charged or as at the date of issue. As an exception to the above, fees for the implementation of corporate actions for member-issuers are calculated on the basis of the situation as at the time of implementation, while the deposit is calculated on the basis of the situation as at the date of the request for the payment of the fee. In the case of an acquisition, the deposit is calculated on the basis of one half of the total number of holders of the target company as at the time of the request for payment.
7. If for any valid reason an order or part of an order is entered in the information system directly by KDD, the system member is liable to pay all the applicable fees in accordance with this price list as if it had issued such order or part of an order itself.
8. A member-issuer obliged to issue shares as book-entry securities only pursuant to the ZGD-1 is any member that first issued any order for the issue of book-entry securities only after the entry into force of the ZGD-1 (4 May 2006) and delivered a written statement to KDD that it issued such order for the issue of book-entry securities only in order to meet its obligations under the ZGD-1, and not on its own independent initiative.
9. The term “shares” also includes other equity securities.
10. The average monthly value of securities used in the calculation of the securities balance maintenance fee is calculated as the average of the values recorded on each day of the month (i.e. the average of the daily values). Securities are deemed credited to a given account on a given day if they are credited to such account at the moment the information system closes for such day. The daily value of shares is the last quoted stock exchange price, unless no such price exists or the shares are (no longer) listed on a regulated market, in which case the value is calculated by dividing the equity of the public limited company by the number of shares of the public limited company issued in the central registry. The value of the equity of the public limited company is determined as:
 - the book value of the public limited company’s equity as reported in the last balance sheet published by AJPES as at the last day of the year before last (or an earlier book value if the book value as at the last day of the year before last is not available, or the share capital if no data is available on the book value of the company’s equity);

- notwithstanding indent 1 above, as of the first day of the following month after KDD is notified by an interested party, the value of the company's equity is determined as the book value of its equity as notified to KDD by such interested party on the basis of an approved annual report or balance sheet prepared for the purpose of implementing a material change of status or due to the initiation of a liquidation or bankruptcy proceeding, provided that such data is more recent than the data referred to in indent 1 of this paragraph;
- notwithstanding indents 1 and 2 above, the daily value of shares cannot be negative for the purposes of calculating securities balance maintenance fees.

The daily value of debt securities is equal to their nominal value. Notwithstanding the preceding sentence, the daily values of debt securities whose annuities also reduce the principal are calculated on the basis of the principal payments set out in and paid in accordance with the amortisation schedule, even if the issuer did not issue an appropriate request to KDD to update the nominal value.

11. Services adapted to a certain status by special order are charged in accordance with a special service agreement.
12. Twice a year, KDD's management board may adjust the service fees laid down in this price list according to the increase in the consumer price index for the period since the last previous adjustment.
13. Value in »CSDR« column defines which service or group of services a fee refers to according to Regulation (EU) No 909/2014 of the European Parliament and of the Council of 23 July 2014 on improving securities settlement in the European Union and on central securities depositories and amending Directives 98/26/EC and 2014/65/EU and Regulation (EU) No 236/2012.
